Hybrid Cloud Engineer | Windows Server Administration | VMware | Azure | Infrastructure Operations |
Microsoft Defender for cloud | ServiceNow

EXPERIENCE

Cognizant

March 2025 – Present

Hybrid Cloud Engineer

Bangalore, KA

- Administered and maintained **Windows Server environments (2012, 2016, 2019, and 2022)**, ensuring high availability, system performance, and operational stability across enterprise infrastructure.
- Managed **VMware vSphere infrastructure**, including virtual machine provisioning, resource allocation, health monitoring, and lifecycle management to support business-critical workloads.
- Supported hybrid cloud operations through **Azure Virtual Machines, Azure Storage, and Azure Portal monitoring**, contributing to efficient cloud resource management.
- Resolved infrastructure incidents, service requests, and operational issues through **ServiceNow** while consistently meeting SLA commitments and maintaining service reliability.
- Performed **DNS and DHCP** administration, server health checks, compliance verification, and infrastructure monitoring to ensure seamless enterprise operations.
- Troubleshoot and remediated **Microsoft Defender security** and compliance alerts, improving server security posture and supporting organizational compliance requirements.
- Leveraged **PowerShell** scripts for server health checks, service monitoring and routine administrative activities, using **AI-assisted development** to accelerate script creation and troubleshooting.
- Leveraged **Generative AI and prompt engineering techniques** to accelerate troubleshooting, root cause analysis, technical documentation, and day-to-day operational support activities.

PROJECTS

Enterprise Hybrid Cloud Infrastructure Operations

2025

Azure, Windows Server, VMware/AVS, DNS, DHCP, Defender for Cloud, ServiceNow

Professional Project

- * Supported enterprise hybrid cloud infrastructure across Microsoft Azure, Windows Server and VMware/AVS environments, ensuring availability, stability and operational continuity.
- * Performed **Azure VM provisioning and deployment**, virtual network and subnet configuration, Azure Storage administration and day-to-day Azure platform operations.
- * Administered Windows Server 2012/2016/2019/2022 environments, including **server health checks**, Windows services, DNS/DHCP administration, **troubleshooting and operational maintenance**.
- * Performed **monthly Windows Server patching activities**, including pre- and post-patch validation, service verification, issue troubleshooting and compliance follow-up.
- * Supported **VMware vSphere / Azure VMware Solution (AVS)** operations including VM provisioning, resource allocation, health monitoring and infrastructure troubleshooting.
- * Monitored and remediated **Microsoft Defender for Cloud security and compliance recommendations**, improving server security posture and reducing non-compliance.
- * Used **ServiceNow** for incident, service request and change management while meeting defined operational SLAs.
- * Utilized PowerShell-based scripts and AI-assisted scripting to support routine health checks, service monitoring and infrastructure administration activities.

EDUCATION

VEMU Institute of Technology

Feb. 2020 – May 2024

Bachelor of Technology (B.Tech) in Mechanical Engineering

Andhra Pradesh, India

SKILLS

Cloud Hybrid Infrastructure: Microsoft Azure, Azure Virtual Machines, Azure Virtual Networks, Subnets, Azure Storage, Azure Portal, Azure VMware Solution (AVS)

Windows Server Administration: Windows Server 2012/2016/2019/2022, DNS, DHCP, Windows Services, Server Health Monitoring, Windows Patching, Troubleshooting

Virtualization: VMware vSphere, ESXi, vCenter, VM Provisioning, Resource Allocation, VM Health Monitoring, Azure VMware Solution (AVS)

Scripting Automation: PowerShell (Basic), AI-Assisted Scripting, Server Health Checks, Service Monitoring, Routine Administrative Automation

Security Compliance: Microsoft Defender for Cloud, Security Recommendations, Compliance Remediation, Server Security Posture

Monitoring ITSM: SolarWinds, ServiceNow, Incident Management, Service Requests, Change Management, SLA Management

Networking: TCP/IP, DNS, DHCP, Azure VNet, Subnets, Network Troubleshooting, Firewall Fundamentals
